

# Services to ships

Thanks to the complementary know-how of the ports of Le Havre, Rouen and Paris, HAROPA PORT provides a global solution in terms of port services and infrastructure, whatever the size of the vessels.

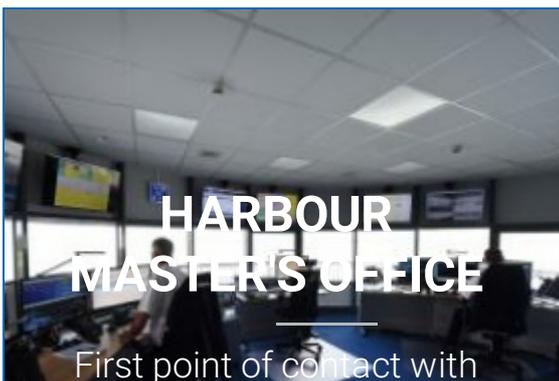

- HAROPA PORT -  
Published on 29 January 2019

HAROPA PORT has been able to create real partnerships in each port area between the Harbour Masters' Offices and the specialized companies, operating 24 hours a day all year round, to offer custom-made services to ships.

On the front line, **the harbor master's office is the first point of contact**. It regulates the order of entry and exit of ships and all navigation movements in the port. Equipped with the most advanced equipment, it is based on full radar coverage of the approach area, channel and basins. It offers a navigation assistance service during channelling and provides information on ship visits via the Internet. The Harbour Master's Office is also responsible for policing water bodies, monitoring hazardous goods and organizing pollution response measures.
